Message from the Guest Editors

In this Special Issue we propose a new research perspective combining ecological domain with historical and heritage conservation problems, as a holistic landscape research approach. We ponder the City, its ecology, past and modern culture, and particularly cultural heritage from the angle of research on the image, aesthetics, form, and function of the urbanscape.

In general, the topics of interest include the impact of concepts of urban ecological networks that provide not only a background for the structure but constituting a crucial city-forming factor. It seems vital to search for the right development directions and methods to be used to combine these values, and to propose a statutory and methodological footing for various locations. The cultural value, based on regional inputs through historical structures and components is an indisputable quality important for landscape conservation. We propose to determine guidelines aimed at developing procedural standards in individual groups.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:—free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed by the [Science Citation Index Expanded](#) and [Social Sciences Citation Index](#) (Web of Science), as well as [Scopus](#) and [other databases](#).

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 14.5 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2020).
